

Front end

DESCRIPTION

Applus IDIADA is able to take over the full responsibility for the fulfilment of all required targets, e.g. pedestrian protection, rigidity and stiffness and high and low speed crash tests. Applus IDIADA can be responsible for the development for all involved parts like Bumper, fenders, hood, radiator grill, radiator module and other under-hood parts. Applus IDIADA integrates CAD, CAE and Testing in order to guarantee the highest possible synergy and to optimise development time and cost..
