

Small series development

DESCRIPTION

All in-house testing / simulation / homologation capabilities

- Consultancy and guidance during the development towards the final homologation
- Prototypes and testing optimisation through testing and homologation synergies
- Global homologation services (including China, Japan, Australia, Malaysia, South Africa, Hong-Kong, etc...)
- USA self certification services: whole USA certification process (including requesting for exemptions if necessary)

Restraint systems integration turn-key projects (EU, USA and RoW)

Dedicated team for small production vehicles development projects:

- ECU management capabilities
- Experience in high technology materials behaviour (ex: carbon fiber)
- Deep knowledge of all major vehicle functionalities
- Experts in product strategy definition according to legal requirements
