

Special vehicles

Applus IDIADA is a designated technical service for the European homologation or national homologation of special vehicles (special purposes or special masses and dimensions).

Applus IDIADA has a long experience in the homologation of their different technical aspects

Applus IDIADA homologation engineers can move to the manufacturer's premises to carry out or witness the homologation tests. Alternatively, the prototype can be sent to our HQ for testing.

Applus IDIADA, as technical consultant for the Spanish administration, participates in the Geneva/Brussels working groups for regulation development

Services offered:

- Whole vehicle type-approval EC/2007/46 for complete/incomplete O vehicles
- Whole vehicle type-approval EC/2007/46 for completed vehicles (bodybuilders)
national type approval / NKS short series / SVA in various European states
- EC directives/ECE regulations approvals for systems and components
- Test reports valid for national type approval in Spain and other EU states
- Special regulations/special transport (heavy masses - big dimensions)
- COP periodical product and process audits / production vehicle tests
- Verification of important modifications of vehicles according to different national laws
