

Complete vehicle durability and reliability

Whole-vehicle durability services provided by a team of more than 180 staff with over 15 years' experience and international operational capacity. Our organization structure, size and international presence allow us to offer flexible and customized solutions to our clients, from the provision of resources and logistic support, to complete services on a turnkey basis with client-integrated technical support.

Our professional team together with state-of-art data acquisition equipment, post-processing tools and extensive test capabilities, will help your company to enhance the durability, reliability and quality of your product and brand image.

Main services:

- Fleet validation
- Structural durability
- High-speed / Powertrain
- General durability / Quality programs
- Accelerated corrosion
- Tests in extreme weather conditions
- Worldwide durability
- Component or specific tests:
 - Tyre wear tests
 - Market driver assessments

Reduction of development time is also guaranteed by the combination of optimized test procedures, 24 hours/day, 7 days per week service, excellent weather conditions and complete proving ground.
